

Purpose of Consortium

Consortium 2032* is an association of high performing schools that advance public education by focusing on the student experience. We work for the success of each of our students through:

1. Developing **leadership** for both leading and managing change
2. Creating the **capacity** to be an organization that supports and learns from each other
3. **Benchmarking** of our work of the student experience to learn from each other

Expanded Purpose:

Consortium 2032 is an association of high performing schools that advance public education by focusing on the student experience. We work for the success of each of our students through:

1. Developing **leadership** for both leading and managing change
 - I. Leadership development would include the development of leaders as professionals and the leaders as professionals in their respective roles
 - II. Developing and implementing the leadership pipeline in order to ensure the ability to scale and sustain deep substantive change
2. Creating the **capacity** to be an organization that supports and learns from each other
 - I. To create capacity that no one single or group of member districts possess but clearly need
 - II. Developing the capacity for change leadership and change management
3. **Benchmarking** of our work of the student experience to learn from each other
 - I. To broaden the concepts and practices of benchmarking to reduce emphasis on outcome comparisons and move toward benchmarking of programs, policies, practices and processes and benchmarking of contexts, cultures and capacities
 - II. The Consortium will define benchmarking topics and targets at our bi-annual meeting

Core Values and Guiding Principles

- Trust and confidentiality
- Student focused
- Becoming better leaders of change
- Focus on national educational issues
- Collaborative not competitive
- Personal and professional growth
- Communication on successes and challenges

**Why 2032? That is the graduation year of this year's kindergarten students!*
